

New to the market

At EnergyQuote, we're constantly looking for new ways to improve the range of products and services we offer our customers. Every quarter we'll be taking the opportunity to let you know about some of our newest launches, starting with **Automatic Meter Reading** and our Performance Service.

Automatic Meter Reading

Our bespoke Automatic Meter Reading (AMR) solution monitors and controls utility consumption in a wide range of environments, applications and industries, specific to your business requirements. We provide an end-to-end metering program which includes project management, meter provision and meter installation through to long-term meter operation and maintenance. Using state of the art hardware we can provide you with secure data collection and on-line management information to help reduce your energy consumption and carbon emissions and reap the associated financial rewards.

Performance Service

Our new Performance Service provides you with a flexible approach to energy buying, helping you turn market volatility to your advantage and achieve the best prices for your energy contracts.

This service is fully managed by our specialist in-house trading team who benchmark all buying and selling activity against pre-agreed performance indicators to remain in line with your specific energy strategy. Our bespoke trading system monitors your risk positions against the live market, 24 hours a day while in-depth reporting systems help to keep you updated with our purchasing performance. We've designed this service to help you take full advantage of pricing drops in the market without switching your attention from your core daily business.

For more information on these services please contact your EnergyQuote Relationship Manager who will be happy to discuss with you in more detail.
